Dear

Thank you for your interest in *Artemisia annua anamed*, and for your enquiry regarding our artemisia starter kit. We shall be pleased to welcome you as a partner in the anamed artemisia programme.

The starter-kit contains:

- 5000 seeds of *Artemisia annua anamed* (A-3). They are supplied in an air-tight plastic container with silica gel.
- one 50g packet of artemisia leaves.
- peat disks for easy sowing.
- materials to aid in taking cuttings.
- the document “*Artemisia annua anamed: Cultivation and uses*” in English, French, German, Portuguese or Spanish (please specify which you require). This document gives comprehensive information, particularly regarding the treatment of malaria.
- the document “*Artemisia annua anamed: From research to experience*”. Over 50 further pages of scientific information in English.
- a folded poster of medicinal plants.
- the book “Natural Medicine in the Tropics I” by Hirt and M’Pia.
- the booklet “Natural Medicine in the Tropics: II Treatments” (our seminar handbook).
- the booklet “AIDS and Natural Medicine”.
- a request for feedback.

Total weight about 1.5 kg.

We can supply our starter kit to:

- a) Community groups, NGOs, churches, missionaries and others who wish to grow *Artemisia annua* in order that the local community can treat malaria with their home grown artemisia tea, and at the same time benefit local small scale farmers.
- b) People or organisations in the Tropics who wish to grow artemisia for sale to industry. However, for the reasons explained on our web-site, we prefer that artemisia is grown and even sold to treat malaria directly in the community as tea.
- c) Researchers and research organisations, which have the aim of helping their country to become more independent in treating malaria.

The document “*Artemisia annua anamed: Cultivation and uses*” gives advice on:

- Cultivation: how to sow the seeds, to take care of the seedlings, to plant them out in the field, to propagate more plants and to harvest and dry the leaves.
- The use of *Artemisia annua* to treat malaria.
- The uses of *Artemisia annua*, both internally and externally, to treat other diseases.

Once you have bought a kit for use in a particular country, we are willing to provide you with the names and addresses of others in that country that have also bought a kit. This facilitates the process of networking and mutual support.

Together with your Starter-kit, you may also like to order refill packs of seeds (Order No. 412) or additional packs of dried artemisia leaves (Order No. 411).

A little more information is given in this short video:

The Starter kit costs 110 Euro plus postage, which is charged as follows: 5 Euro within Germany, 20 Euro within Europe or 30 Euro worldwide (by airmail). Orders will be dispatched within one week of receipt. The parcel is sent by airmail by GERMAN POST, please give us therefore your postal address.

Often the parcel arrives quickly, but in some cases it took upto 4 weeks (Europe) or 2 months (worldwide). Therefore please order as early as possible.

Orders from outside of Germany must be paid in advance.

You may pay in one of three ways:

1. **BY SWIFT** to the account given below:
Name and address of the beneficiary: Hans-Martin Hirt, Schafweide 77, 71364 Winnenden, Tel. +49 7195-910225, Germany
